Handbagged
A Synopsis
Moira Buffini’s mischievous comedy speculates on a very provocative question: What did the world’s most powerful women talk about behind closed doors? Of course no one was actually privy to the meeting between the monarch and her prime minister, but in Handbagged we have Moira Buffini’s perspective, which is fresh and engaging. The play covers the eleven year period of Thatcher’s time as prime minister and we see a younger “Liz” and “Mags” battle their delicate balance of power over their tea time talks, with their older selves hovering near them ready to comment on the conversations. The play shows us a glimpse of the possible frustrations the Queen had, as being a sovereign who was unable to make executive decisions, but could only advise the Prime Minister. The play illustrates how difficult it could have been for the Queen when faced with Thatcher and her unflinching ideas, harsh and uncaring values and her belief that a Queen is just meant to shake hands and smile. Handbagged is about human relationships, differing opinions and it also refers to events that have shaped our society, our government and our attitude to politicians.

Part III: The Queen and her Prime Ministers
During her 64-year reign, 13 prime ministers have served Queen Elizabeth II. Many relationships were formed -- from Winston Churchill, to "Iron Lady" Margaret Thatcher -- and some proved more difficult than others.

While most of their political and personal conversations are kept strictly confidential, memoirs and historic interactions provide an insight into their relationships.

Take a look back at those who have served during Queen Elizabeth II´s reign.

1. WINSTON CHURCHILL 1951-1955

The Queen chats with Margaret Thatcher at the National Portrait Gallery in London May 4, 2000.
While Thatcher and the Queen were the closest in age, Thatcher kept their encounters strictly professional, formal and famously stiff. The "Iron Lady," as she became known, reportedly had a tense relationship with the monarch during their traditional weekly meetings. Thatcher also viewed her annual visits to the royal home in Balmoral, Scotland as interrupting her work. But despite this, Thatcher is said to have been incredibly respectful of the Queen and eventually became her longest serving prime minister.

Always a controversial figure, she has been described as one of the greatest and most influential politicians in British history, even as arguments over Thatcherism persist.\(^1\)

On moving into 10 Downing Street, Thatcher introduced a series of political and economic initiatives intended to reverse high unemployment and Britain’s struggles in the wake of the Winter of Discontent \(^2\) and an ongoing recession.\(^3\) Her political philosophy and economic policies emphasized deregulation (particularly of the financial sector), flexible labor markets, the privatization of state-owned companies, and reducing the power and influence of trade unions. Thatcher’s popularity during her first years in office waned amid recession and high unemployment, until victory in the 1982 Falklands War and the recovering economy brought a resurgence of support, resulting in her re-election in 1983.

As Prime Minister, Thatcher met weekly with Queen Elizabeth II to discuss government business, and their relationship came under close scrutiny. Biographer John Campbell says their relations were "punctiliously correct but there was little love lost on either side". The Queen’s press secretary leaked anonymous rumors of a rift, which were officially denied by the Palace. Campbell concludes that Thatcher had "an almost mystical reverence for the institution of the monarchy ... Yet at the same time she was trying to modernize the country and sweep away many of the values and practices which the monarchy perpetuated".\(^4\) Thatcher later wrote: "I always found the Queen’s attitude towards the work of the Government absolutely correct ... stories of clashes between 'two powerful women' were just too good not to make up."\(^5\)

Thatcher was re-elected for a third term in 1987. During this period her support for a Community Charge (referred to as the "poll tax") was widely unpopular, and her views on the European Community were not shared by others in her Cabinet. She resigned as Prime Minister and party leader in November 1990, after Michael Heseltine launched a challenge to her leadership. After retiring from the Commons in
1992, she was given a life peerage as Baroness Thatcher, which entitled her to sit in the House of Lords. After a series of small strokes in 2002, she was advised to withdraw from public speaking. Despite this, she managed to pre-record a eulogy to her great friend and political comrade, Ronald Reagan prior to his death, which was broadcast at his funeral in 2004. In 2013, she died of another stroke in London, at the age of 87.

2 The Winter of Discontent refers to the winter of 1978–79 in the United Kingdom, during which there were widespread strikes by public sector trade unions demanding larger pay rises, following the ongoing pay caps of the Labour Party government led by James Callaghan against Trades Union Congress opposition to control inflation, during the coldest winter for 16 years.
3 In her foreword to the 1979 Conservative party manifesto, Thatcher wrote of "a feeling of helplessness, that a once great nation has somehow fallen behind". Thatcher, Margaret (1979). "Conservative Party Manifesto 1979". Foreword.

Transcript:
Thatcherism describes the conviction politics, economic, social policy and political style of the British Conservative Party politician Margaret Thatcher, who was leader of her party from 1975 to 1990. It has also been used to describe the beliefs of the British government under Thatcher as Prime Minister from 1979 to 1990, and beyond into the governments of John Major, Tony Blair and David Cameron. An exponent or supporter of Thatcherism is regarded as a Thatcherite.

Thatcherism represented a systematic, decisive rejection and reversal of the post-war consensus, whereby the major political parties largely agreed on the central themes of Keynesianism, the welfare state, nationalised industry, and close regulation of the economy. There was one major exception: the National Health Service, which was widely popular. She promised Britons in 1982, the NHS is "safe in our hands."

Both the exact terms of what makes up Thatcherism as well as its specific legacy in terms of British history over the past decades are controversial. In terms of ideology, Thatcherism has been described by Nigel Lawson, Thatcher’s Chancellor of the Exchequer from 1983 to 1989, as a political platform emphasising free markets with restrained government spending and tax cuts coupled with British nationalism both at home and abroad. The Daily Telegraph stated in April 2008 that the programme of the next non-conservative British government, Tony Blair’s administration with an emphasis on 'New Labour', basically accepted the central reform measures of Thatcherism such as deregulation, privatisation of key national industries, maintaining a flexible labour market, marginalising the trade unions, and centralising power from local authorities to central government.

Thatcherism attempts to promote low inflation, the small state, and free markets through tight control of the money supply, privatisation and constraints on the labour movement. It is often compared with Reaganomics in the United
Thatcherism is thus often compared to neoliberalism. Milton Friedman said that "the thing that people do not recognise is that Margaret Thatcher is not in terms of belief a Tory. She is a nineteenth-century Liberal." Thatcher herself stated in 1983: "I would not mind betting that if Mr Gladstone were alive today he would apply to join the Conservative Party". In the 1996 Keith Joseph memorial lecture Thatcher argued that "The kind of Conservatism which he and I ... favoured would be best described as 'liberal', in the old-fashioned sense. And I mean the liberalism of Mr Gladstone, not of the latter day collectivists". However, Thatcher once told Friedrich Hayek: "I know you want me to become a Whig: no, I am a Tory". Hayek believed "she has felt this very clearly".

But the relationship between Thatcherism and liberalism is complicated. Thatcher’s former Defence Secretary John Nott claimed that "it is a complete misreading of her beliefs to depict her as a nineteenth-century Liberal". As Ellen Meiksins Wood has argued, Thatcherite capitalism was compatible with traditional British political institutions. As Prime Minister, Thatcher did not challenge ancient institutions such as the monarchy or the House of Lords, but some of the most recent additions: such as the trade unions. Indeed, many leading Thatcherites, including Thatcher herself, went on to join the House of Lords: an honour which Gladstone, for instance, had declined.

Thinkers closely associated with Thatcherism include Keith Joseph, Enoch Powell, Friedrich Hayek and Milton Friedman. In an interview with Simon Heffer in 1996 Thatcher stated that the two greatest influences on her as Conservative leader had been Joseph and Powell, who were both "very great men".
Part V: Miner’s Strike of 1984

MINER’S STRIKE QUICK FACT FILE

12 March, 1984 - Miners strike over threatened pit closures.
9 April, 1984 - Dozens of miners arrested in picket line violence
29 May, 1984 - Major clash between police and miners at Orgreave.
3 March, 1985 - The NUM executive narrowly vote for a return to work.
2002 - Arthur Scargill retires as NUM President

The Miners’ Strike was one of the hardest fought industrial disputes in British history. Its battlegrounds were the old mining areas including the Notts and Derbyshire coalfields. Thousands of coal miners came out in protest against proposed pit closures and job losses.

We look back at the key events of the strike, and investigate what happened to the miners when the East Midland pits finally closed.

The Miners’ Strike marked the beginning of the end for Britain’s coal industry. Once an important part of the economy, coal was no longer a force to be reckoned with.

After the Second World War coal had been “king” in the Nottinghamshire, Derbyshire and Leicestershire coalfields. Whole communities were built on the black stuff, and the area’s many pit villages were renowned for their close-knit spirit.

Before the Miners’ Strike, the East Midlands boasted around 30 working mines. Just a few years later most of those mines had closed with the loss of tens of thousands of mining jobs.

Today, only three mines remain - all in Nottinghamshire.

So where did it all go wrong?

The 1984 Miners’ Strike was a last attempt by the mining unions to stop mining closures and the loss of jobs.
In March 1984 more than 187,000 miners came out on strike when the National Coal Board announced that 20 pits in England would have to close with the loss of 20,000 jobs.

It was the start of one of the most confrontational strikes ever seen, marred by picket line violence and clashes between police and miners.

Miners in Nottinghamshire, Derbyshire and Leicestershire eventually came out on strike. But some miners continued to work and were branded as "scabs" by their colleagues when they crossed picket lines.

The Government branded the striking miners as "the enemy within". When the strike ended 12 months later, it was estimated that the total cost had been £3 billion. Over 11,000 people had been arrested, and around 5,000 miners stood trial for a variety of offences.

Many of the threatened closures took place in 1992. Mining communities throughout the country were scarred, and many never fully recovered.

It was the end of the industry that had once been the backbone of industrial Britain. In 1984 there were 170 collieries in Britain, employing more than 190,000 people. Today there are fewer than 20 collieries (coal mines), employing a workforce of around 5,000.

There is no official record of what happened to the thousands of miners who were forced to leave the industry over the last 20 years. However a 1994 study by the Coalfield Communities Campaign, based on a survey of 900 ex-miners, painted a depressing picture. It found that more than 50% of ex-miners were still out of work more than a year after leaving the pit.

Part V: Assassination attempt of 1984

Many historians have speculated that the assassination attempt on Margaret Thatcher and the Conservative Party was a direct result of the Miner’s strike, increased police violence, and general policies of the Tory government.

The Brighton hotel bombing was a Provisional Irish Republican Army (IRA) assassination attempt against the top tier of the British government in 1984. It missed its main targets but killed five others.

It occurred on 12 October 1984 at the Grand Hotel in Brighton, England. A long-delay time bomb was planted in the hotel by IRA member Patrick Magee, with the purpose of killing Prime Minister Margaret Thatcher and her cabinet, who were staying at the hotel for the Conservative Party conference. Although Thatcher narrowly escaped injury, five people were killed including a sitting Conservative MP, and 31 were injured.
Margaret Thatcher began the next session of the conference at 9:30 am the following morning, as scheduled. She dropped from her speech most of her planned attacks on the Labour Party and said the bombing was "an attempt to cripple Her Majesty's democratically elected Government":

*That is the scale of the outrage in which we have all shared, and the fact that we are gathered here now—shocked, but composed and determined—is a sign not only that this attack has failed, but that all attempts to destroy democracy by terrorism will fail."

One of her biographers wrote that Thatcher's "coolness, in the immediate aftermath of the attack and in the hours after it, won universal admiration. Her defiance was another Churchillian moment in her premiership which seemed to encapsulate both her own steely character and the British public's stoical refusal to submit to terrorism".

Immediately afterwards, her popularity soared almost to the level it had been during the Falklands War. The Saturday after the bombing, Thatcher said to her constituents: "We suffered a tragedy not one of us could have thought would happen in our country. And we picked ourselves up and sorted ourselves out as all good British people do, and I thought, let us stand together for we are British! They were trying to destroy the fundamental freedom that is the birth-right of every British citizen, freedom, justice and democracy."
